PVOH 1.75mm Filament

Robox® PVOH

Water-Soluble Support

RLH-PVA-NT001

Robox® PVOH is a water-soluble filament designed to support overhangs of parts printed in ABS or TPU. PVOH dissolves easily in lukewarm water and allows models to be printed with no fear of damage as support material is removed. The material is biodegradable when dissolved in water and offers great adhesion to styrene-based materials, which typically print at higher temperatures in heated environments.

PVOH applications:

- ⚙️ Water-soluble support material for ABS or TPU

PVOH colours:
