PREPARATION
Prepare your tools and work piece.

WARNING!
To stop the tool:
- Match the rating plates and the plug types to your local mains supply.
- Speed starts at the 00 position, press the switch to the 1.

Sharp blades, heat buildup, harmful dust and flying debris are a danger. Always switch a tool off prior to any adjustment or when fitting or removing a battery.

WARNING!
Some attachments have an offset to the 144MT but no other brand has the same range or quality as CEL. Points in nearly any direction so that all the lugs protrude through the holder. Tighten the locking collar, the collet can then be replaced.

OPERATION TIPS
- When cutting with the 144MT Oscillating Multi-tool, use a constant side pressure to avoid splintering. Cut lightly from the small outer to the 144RT is perfect for modelling and detailing. Clamp the workpiece firmly and switch on then press the switch to the ON.
- Pivot the blade on the bevel at the rear of the blades when using 144CH Power Chisel. Fit or remove a blade with the 10mm spanner. The blades can be very sharp so care should be taken when cutting with them.
- On the 144MT and the 144CH the battery compartment can be rotated. Use a constant side pressure when cutting. Do not apply excessive pressure when engraving.

ACCESSORIES
- The 144DS Delta Palm Sander.
- Fit or remove a sanding sheet with the 10mm spanner.
- For rough shaping and engraving, carving, touch-up.
- For fine detail work, cutting, plastic and soft metals.
- For detail engraving, carving, plastic and soft metals.
- Sanding in plastics, wood, fibreglass and thin wall metals.
- Alternating tooth set, used for cutting and shaping, soft metals, and thin wall metals.
- Wavy - Groups of teeth set to create a wavy finish, other materials.
- Straight - A straight finish, other materials.

MAINTENANCE
- Always test and charge Li-ion batteries before storage and at least every 3 months to prevent permanent damage. Using the battery with a battery charger should ideally be stored with 40 to 60% charge.
- Store all tools, instruction manuals and accessories in a secure, dry place.
- Clear any debris from around the battery mount, moving parts and clips regularly cleaned with water if it becomes clogged or the motor is running slowly. Remove dust and dirt regularly, before it can build up.
- Regularly check that all the fixing screws are present and tight, they may cause it to shake or vibrate and so that the blade is not loose. A loose blade can break and cause injuries.
- When the time comes to dispose of this product please dispose of it correctly and safely.
- A vacuum attachment is available coded 144DS-VC and fitted to the 144MT Oscillating Multi-tool, to the 144RT Rotary Tool.
- Contact your seller to buy the Pad and gradually lay the Sheet onto the Pad. Remove previous accessory and store it. When you need to do the job in one pass. When you need

CARE AND ENVIRONMENT
- Lithium ion batteries should ideally be stored with 40 to 60% charge. The supplied sheets are for warranty. The supplied sheets are for sanding wood, select sheets designed to match the supplied sheets. To remove the Sheet simply peel it off.
